DETAILED ACTION

Response to Amendment

1. The amendment, filed 4/25/2009, has been entered and made of record. Claims 1-27 are pending in the application.

Response to Arguments

1. Applicant's arguments with respect to claims 1-27 have been considered but are moot due to the 112 rejection that follows. Should the rejection be overcome in a future submission, the arguments will be considered in light of the limitations of the claims at that time.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

1. Claims 1-27 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Independent claims 1,15,16,21 and 25 each recite, "a rating value for establishing a plurality of new in and out points". The examiner submits that this limitation is not supported by

the specification. On p. 11, Lines 2 and 3, the specification states, "The rating value establishes "in and out points"...". First, there is no mention of a plurality of points. Second, "new" in and out points suggest that there were original in and out points, which the claims suggest but the specification does not support. There is no connection between the original "in and out points" and the alleged "new in and out points" at least not one enough to allow one of ordinary skill in the art to discern. The numerous limitations regarding the "in and out points" distinguish over the Franken reference, but those limitations have to be supported by the specification. The examiner suggests amending the claims to mimic the specification as to the in and out points in order to overcome this rejection.

Conclusion

1. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
